

Cloudflare Setup Instructions For Manager

Step 1: Login to Cloudflare

Open: <https://dash.cloudflare.com>

Use company account.

Step 2: Create R2 Buckets

Open: Storage & Databases → R2 Object Storage

Create:

Bucket 1: **blueocean-reports**

Purpose:

- Reports
- AI Reviews
- Human Reviews
- Comments
- Versions
- Revision Requests

Bucket 2: **blueocean-assets**

Purpose:

- Images
- Charts
- Covers
- Brand Assets

Step 3: Add Team Members

Open: Manage Account → Members

Invite: Yash's Email

Role recommendation:

- Administrator

OR

- Developer + R2 Permissions (depending on company policy)

Step 4: Create R2 API Token

Open: Manage Account → API Tokens → Create Token

Select **Custom Token**.

Permissions:

- Account → Workers R2 Storage → Edit
- Account → R2 Storage → Edit

Resources: Include All Accounts

Create token.

Step 5: Create R2 Access Keys

Open: R2 → Manage R2 API Tokens → Create API Token

Generate:

- Access Key ID
- Secret Access Key

Note: Manager must store these securely.
